EXAMINER'S STATEMENT FOR REASONS FOR ALLOWANCE

Claims 3, 5, 7 and 9-11 are allowable over prior art.

The following is an examiner's statement of reasons for allowance: claims 3, 5, 7 and 9-11 are allowed because the references cited fail to teach, as applicant has, an intermittent calibration method and apparatus comprising multiplexing the calibration signal sent by the calibration signal transmitter with a communication signal spread using a signal-specific spreading code in a same frequency band, extracting the communication signal and the calibration signal from the received signal, calibration processing using the extracted calibration signal in parallel with a communication using the extracted communication signal, and demodulating the extracted communication signal using the result of the calibration processing, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Takakusaki (US 6594509 B1) discloses Array-antenna radio communication apparatus essentially the same than the disclosed in the present application with a filing posterior date than the priority filing date of the present application and from the same assignee.
